"When Fournier wrote his 'Manuel Typographique,' typography was—as now—fashionable, and the book was written largely for the uninitiated; the 'Manuel' is therefore somewhat of a popular treatise: there is little or nothing in it that is either beyond the layman's grasp or beneath the expert's notice.

"Since the original, which has never been reprinted, is rare, this English edition will find favour with those who would otherwise be unable to possess the work, as well as with those who would rather have the text in English.

"The whole range of engravings illustrating the tools of the typefounder are faithfully reproduced in this volume by the collotype process."

The following interesting note describes the foundry and characters of the celebrated printer and founder Gillé.

"My foundry has been in existence for 60 years, from father to son. It has often given employment to 100 workmen. . . . In 1789 I succeeded my Father, who was type-founder to the King during the last two reigns." He gives much interesting information on different printing-presses, inks and paper made in France and other countries.
